

Electrical Engineering Volume 27 (Paperback)

Filesize: 8.36 MB

Reviews

Here is the finest ebook i have got read until now. It really is simplistic but excitement within the 50 percent in the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Lupe Connelly)

ELECTRICAL ENGINEERING VOLUME 27 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .boat is 54 sq. ft., while the average cross-section of a canal, on those sections upon which most of the tests were made, is 440 sq. ft.; the ratio of section being practically 1 to 8 (Fig. 5). The current in the open-river section is so varied that reliable results expressing difference in pull required in the comparatively narrow sections and in these wider sections could not be obtained. tion. The greatest pull is exerted when the last control-point is reached, but this does not greatly exceed the pull required at full running speeds. Acceleration And Maximum Rope Pulls Compared with electric railway operation, the rate of acceleration practicable of attainment in towing canal boats is low. Acceleration, however, is relatively unimportant, as the time of run is long compared with the time consumed in accelera Table III gives the maximum and average results obtained in four-, two-, and one-boat tests, both loaded and empty. Towing Machines Tested. In most of our tests Mining Locomotive 15 and Tractors 1 and 3 were used. Comparison was made at speeds and effective pulls as nearly identical as was found practicable. As to meet these conditions the various machines tested required different operating energy, and as change in the energy affected the motor efficiency, the electric losses in the motors in all cases have been deducted from the kilowatt input in determining the mechanical efficiency of the machines. The mechanical loss of the motors and gears in each case...
