*****.The Descent of ManSelection in Relation to SexCharles

DarwinThe Descent of Man, and Selection in Relation to Sex is

a book by English naturalist Charles Darwin, first published in

1871, which applies evolutionary theory to human evolution,

and details his theory of sexual selection, a form of biological

adaptation distinct from, yet interconnected with, natural

selection. The book discusses many related issues, including

evolutionary psychology, evolutionary ethics, differences

between human races, differences between sexes, the

dominant role of women in mate choice, and the relevance of

the evolutionary theory to society.THE NATURE of the following

work will be best understood by a brief account of how it came

to be written. During many years I collected notes on the origin

or descent of man, without any intention of publishing on the

subject, but rather with the determination not to publish, as I

thought that I should thus only add to the prejudices against

my views. It seemed to me sufficient to indicate, in the first

edition of my Origin of Species, that by this work...
