RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Original publisher: Greenbelt, Md. : NASA Goddard Space Flight Center, 2000 OCLC Number: (OCoLC)83760443 Excerpt: . . . 9. Data Manipulations 9. 1 Formulae Rf Cstd Astd Cs Rf As Where: Rf Response factor Astd Average of 10 standard peak areas Cstd Concentration of the standard Cs Concentration of the sample As Peak area of sample CH_4 and CO_2 concentrations were calculated from the average of 10 peak areas of known CH_4 and CO_2 standards. The response factor was calculated as the concentration of the known standard divided by the average of 10 standard peak areas. The peak area of the unknown sample was multiplied by the response factor. Fitting a regression curve to the time series of CI-I4 and CO_2 concentrations made the flux calculations. The flux rate of a gas is calculated using the following equation: F ppmv min (P R MW) 1 T Vc Ac C Where: F flux (mg m2 d) P Chamber pressure (atm) R 8. 2054 x 10 5 m3 atm mol K MW Molecular weight of the analyte T Chamber temperature (K...

Reviews

A new e book with a brand new standpoint. I am quite late in start reading this one, but better then never. I discovered this ebook from my i and dad advised this publication to understand.
-- Jada Franecki II

Here is the very best book i have got read through until now. I could possibly comprehended everything using this composed e publication. You will not sense monotony at whenever you want of your time (that's what catalogues are for concerning should you ask me).
-- Izaiah Schowalter
