Elementary Notes on Conifers (Classic Reprint) (Paperback)

By A H Church

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Elementary Notes on Conifers Land Flora: as constituting the autotrophic vegetation of subaerial environment (beyond the horizon of saprophytic phyla of Fungi), expresses the progression of plant-life from the medium of water to that of atmosphere; involving not only the factor of diminishing water-supply (ultimately reduced to a vanishing point), but more definitely that of nutrition in terms of food-salts no longer available in the general medium, and implying the mechanism of absorption, conduction, and transpiration. Older phases of sexual reproduction, involving fertilization by mobile gametes in a watery medium, are long retained; but dispersal is provided for by the evolution of wind-borne spores, in a manner paralleling that of many subaerial Fungi, as spores produced in a sporangium. Three main lines of advance, roughly indicated as (i) Bryophyta (Mosses), (2) Pteridophyta (Ferns), (3) Phanerogams (Seed Plants), not necessarily in linear sequence, are to be regarded as parallel phases of progression, passing successively to higher stages of land-organization. Bryophyta, including Mosses (Bryineae), with Liverworts (Hepaticae) and Jungermanniae: one general plan of organization and life-cycle common...
