Removal of Nitrate by an Algal System: April 1971 (Classic Reprint) (Paperback)

By Unknown Author

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Removal of Nitrate by an Algal System: April 1971 The Bio-Engineering Aspects of Agricultural Drainage reports describe the results of a unique interagency study of the occurrence of nitrogen and nitrogen removal treatment of subsurface agricultural wastewaters of the San Joaquin Valley, California. The three principal agencies involved in the study are the Water Quality Office of the Environmental Protection Agency, the United States Bureau of Reclamation, and the California Department of Water Resources. Inquiries pertaining to the Bio-Engineering Aspects of Agricultural Drainage reports should be directed to the author agency, but may be directed to any one of the three principal agencies. The Reports It is planned that a series of twelve reports will be issued describing the results of the interagency study. There will be a summary report covering all phases of the study. A group of four reports will be prepared on the phase of the study related to predictions of subsurface agricultural wastewater quality one report by each of the three agencies, and a summary of the three reports. Another group...
